Brook Hollow Park Channel Improvements Completed

FOR IMMEDIATE RELEASE: Bedford, Texas - (Tuesday, November 10, 2020) – After nearly 3 years of construction, the Brook Hollow Park Channel project has been completed.

In February 2018 severe storms and flooding caused the channel wall to collapse. The redesign began in March 2018 and consisted of topographical surveys, geotechnical analysis, moving a large sanitary line, and constructing a 10,500 square-foot wall. Construction of all these improvements began in August 2019 and was completed in July 2020.

Brook Hollow spans nine-acres on the southwest side of Bedford and has several amenities residents can enjoy such as a half basketball court, linear trails, a playground, and more.

“The Public Works Department and the Parks Department worked together during the entire process to make Brook Hollow Park a peaceful and fun place to visit with your family,” Kenny Overstreet, Public Works Director stated. “The overall appearance is great, and I hope to see more people using this space on a regular basis.”

For more information on the project, please visit <https://bedfordtx.gov/697/Public-Works-Projects>.
